Sharing expertise. Creating Professionals.

NDT COURSE ON ULTRASONIC THICKNESS TESTING

LEVEL II (Limited Certification)		2 days
As per ASNT SNT-TC-1A - 2006 Recommended Qualification Hours for Initial Training and Experience		
Training	Level II:08 hrs	
Experience	Level II: 40-hrs	

COURSE OBJECTIVES

To provide a basic knowledge of ultrasonics to enable a participant to carry out thickness gauging tests according to an established procedures. The course is especially designed to provide a sound theoretical knowledge and practical skills for carrying out ultrasonic thickness testing

COURSE CONTENTS

- 1. Introduction
- 2. Ultrasonic Fundamentals
- 3. Ultrasonic Transducers Construction and Operation
- 4. Longitudinal Waves
- 5. Interfaces
- 6. Effects of Reflector/Test Geometry
- 7. Pulse-Echo Test Set up
- 8. Couplants and Coupling Techniques
- 9. Ultrasonic Instrumentation
- 10. Thickness Measurement

Level II Practical Training

Ultrasonic thickness testing of pipes, tubes, hollow machined components, castings, plates and corroded parts
